Sample ID SD230710-016 (80933)		Matrix Concentrate (Inhalable Cannabis Good)

Analyses executed CANX, QARUS	5H	Unit Mass (g) 5.0

Laboratory note: The estimated concentration of the unknown peak in the sample is 7.43% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to the interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC (+)d8-THC is a different compound from the main (-)d8-THC canobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available. It is either to be 4300⁺THC and d9-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be 4330⁺C.
