#### sample Flying Monkey - Heavy Hitter Blend - 50mg D8/ THC-P 5ct Gummy Bag - Blueberry -N02092

Sample ID SD221103-043 (54583) Matrix Edible (Other Cannabis Good) Tested for White Label Leaf Sampled -Received Nov 03, 2022 Reported Nov 07, 2022 Analyses executed CANX Unit Mass (a) 11.955 Serving Size (g) 2.391

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.31% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC (+)d8-THC (+)d8-THC is a different compound from the main (-)d8-THC cannobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be 1.98%

#### sample Flying Monkey - Heavy Hitter Blend - 50mg D8/THC-P 5ct Gummy Bag - Sour Green Apple - N02088

Sample ID SD221025-055 (53895) Matrix Edible (Other Cannabis Good) Tested for White Label Leaf Sampled -Received Oct 25, 2022 Reported Oct 27, 2022 Unit Mass (a) 13.563

Analyses executed CANX

Servina Size (a) 2.713

Result

Result

Laboratory note: unit size = 5 pieces | The estimated concentration of the unknown peak in the sample is 0.34% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromotogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC, (+)d8-THC is a different compound from the main (-)d8-THC contabinated and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC total d8-THC is estimated to be 2.08%.

This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results are reported on an "as freewed" basis, unless indicated otherwise. When a Pass/Fall status is reported, that status is intended to be in accidance with federal, state and local lows which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fall evolution unless explicitly negrine (state of customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fall evolution unless explicitly on request.

## sample Flying Monkey - Heavy Hitter Blend - 50mg D8/THC-P 5CT Gummy Bag - Strawberry - N02086

Sample ID SD221024-005 (53897)	Matrix Edible (Other Cannabis Good)							
Tested for White Label Leaf								
Sampled -	Received Oct 24, 2022	Reported Oct 26, 2022						
Analyses executed CANX		Unit Mass (g) 13.584	Serving Size (g) 2.717					

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.34% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC (+)d8-THC (s a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the segmention of (+)d8-THC and d9-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total d8-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total d8-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total d8-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority.

PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

#### sample Flying Monkey - Heavy Hitter Blend - 50mg D8/THC-P 5ct Gummy Bag - Watermelon Lemonade - N02085

Sample ID SD221025-056 (54032)	Matrix Edible (Other Cannabis Good)							
Tested for White Label Leaf								
Sampled -	Received Oct 25, 2022	Reported Oct 28, 2022						
Analyses executed CANX		Unit Mass (g) 13.174	Serving Size (g) 2.636					

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.29% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC (+)d8-THC (+)d8-THC is a different compound from the main (-)d8-THC canabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total d8-THC is problematic to be 2.40%. Note: 5 pieces per package.
